-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Nakamura et al. (5,587,783). The image forming apparatus by Nakamura et al. comprising an image bearing member, an intermediate transfer member, and a controlling device for controlling a drive of the image bearing member before the drive of the intermediate transfer member (column 8, line 56 – column 9, line 2; column 9, lines 10-15; column 10, line 65 – column 11, line 12; column 11, lines 18-23; column 11, lines 44-52). The image bearing member is cleaned by a contact blade (figure 4). A detecting device for detecting a position of the intermediate transfer member and image forming is started based on this detecting (column 11, lines 18-23).

3. Claims 7-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Masuda (2004/0155949A1). The image forming apparatus by Masuda comprising an image bearing member, an intermediate transfer member, and a controlling device for controlling a drive of the image bearing member before the drive of the intermediate transfer member ([0065], [0070-0076]). A contact blade 65 cleans the image bearing member. A detecting device for detecting a position of the intermediate transfer member and image forming is started based on this detecting.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

6. Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Nakamura et al. in view of Nomura et al. (6,708,011, cited by examiner 12-15-2004). Nakamura et al. does not teach the claimed process cartridge.

Nomura teaches a process cartridge comprising an intermediate transfer member and an image bearing member (all figures).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to use the teaching of Nomura et al. with the image forming device by Nakamura et al. to obtain the ease of maintenance and the convenience of a process cartridge.

***Prior Art***

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Choi et al., Arcaro et al., and Matsumoto teach pertinent prior art.

***Contact Information***

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Quana M. Grainger whose telephone number is 571-272-2135. The examiner can normally be reached on 8am-6pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Arthur Grimley can be reached on 571-272-2136. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
